

POTTIEZ

TOOLING AND STAMPING

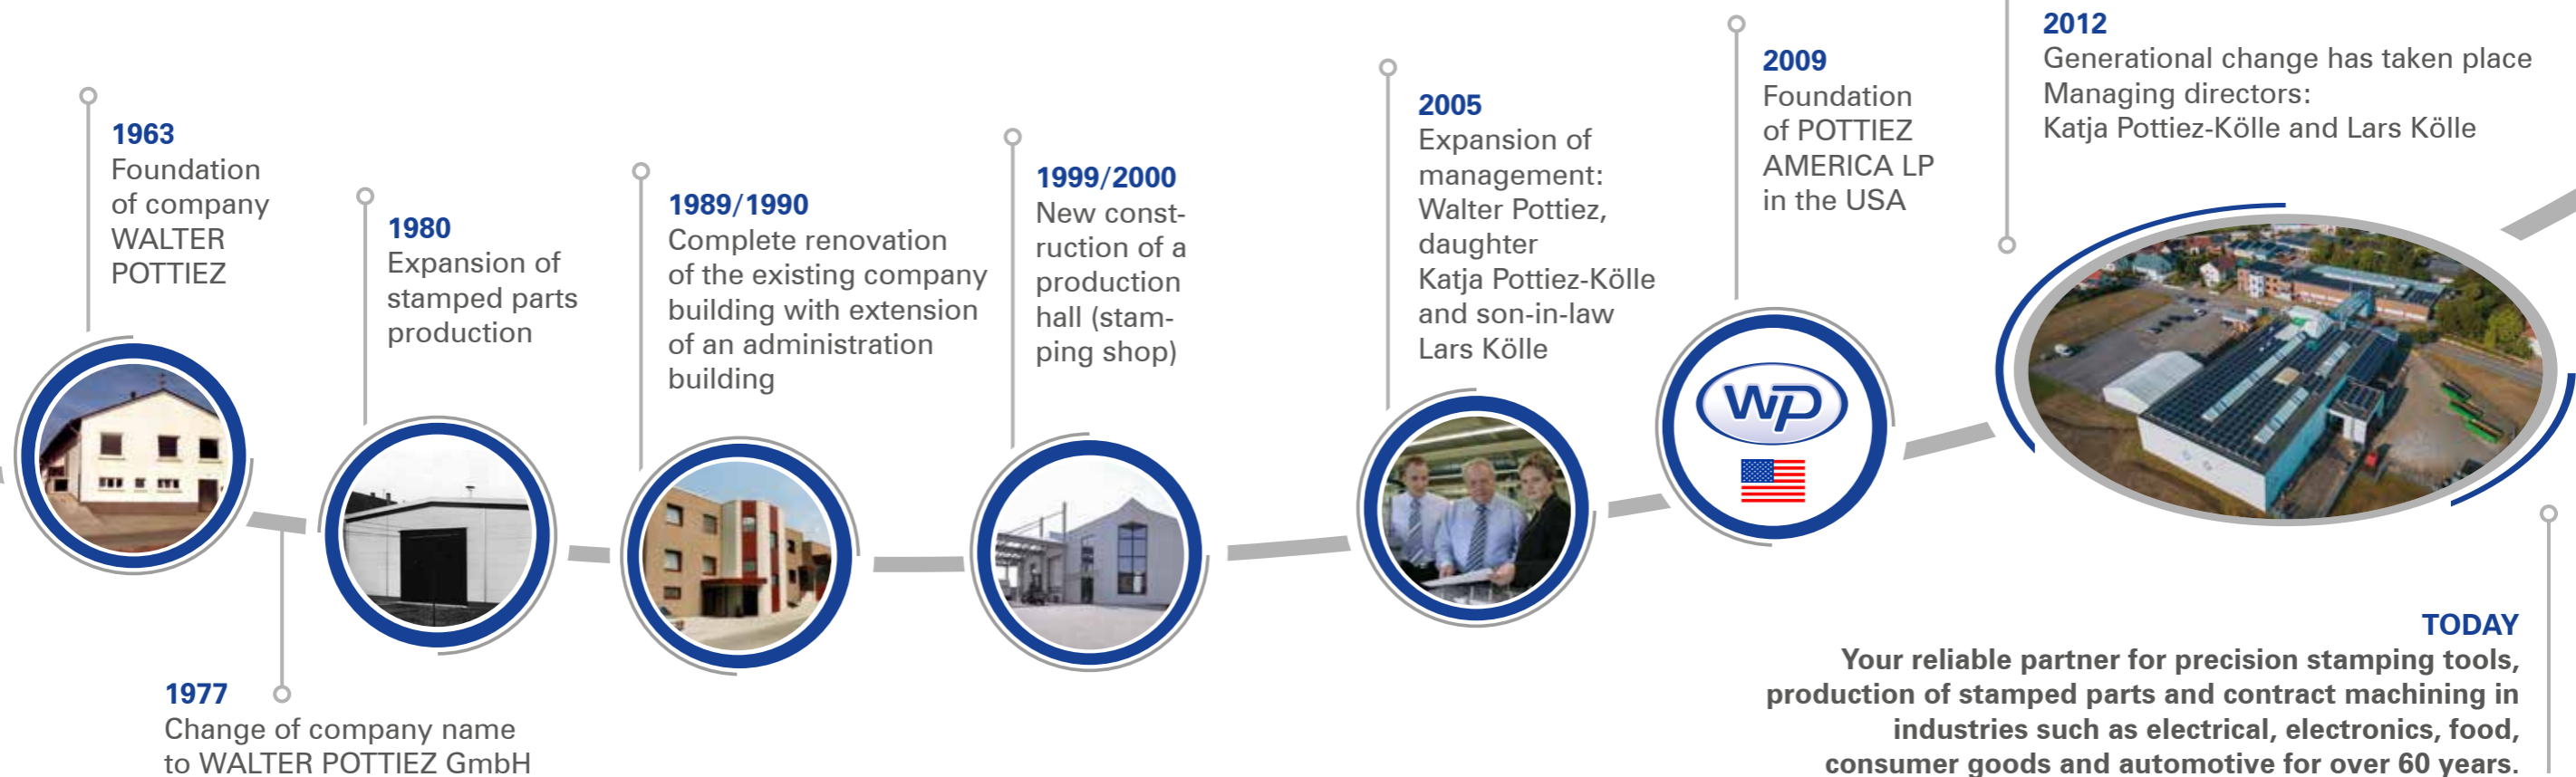

**CREATIVE
COMPETENT
INNOVATIVE**

Your specialist for precision manufacturing

Originally active in tool and die making with an attached stamping shop for the watch industry, among others, Pottiez is now an international partner for almost all sectors of industry, responding quickly and flexibly to customer needs.

Using the latest technology and traditional craftsmanship, we deliver high-performance tools and precision stamped parts of convincing quality. Thanks to our many years of experience and personal responsibility, we are able to guarantee the highest performance and flexibility.

Innovation and perfection

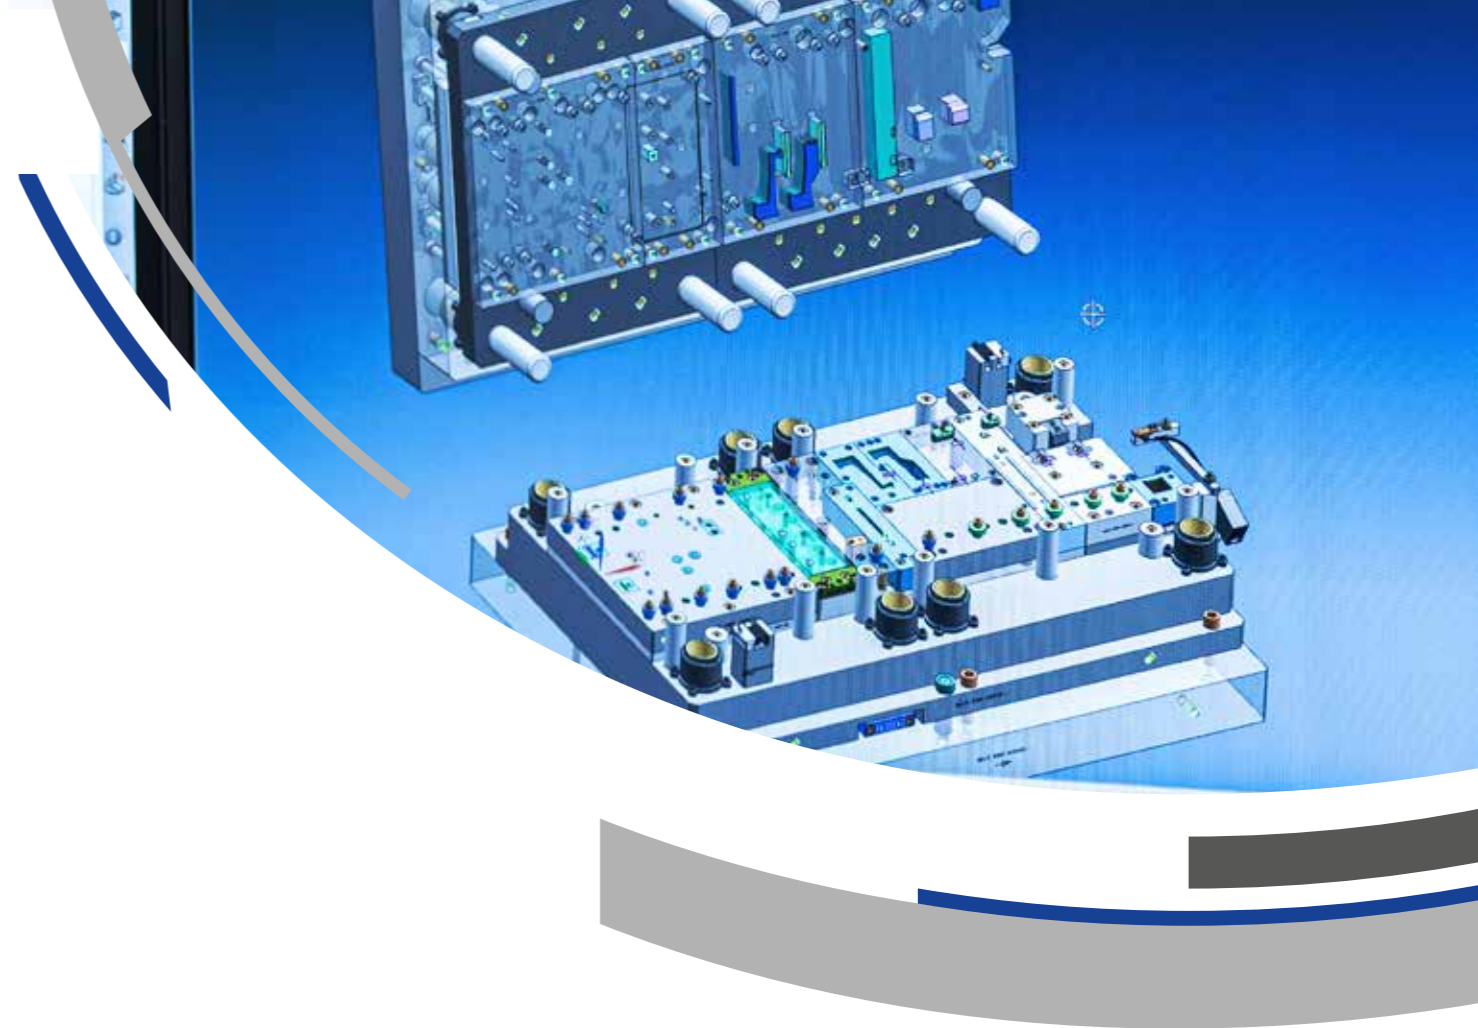

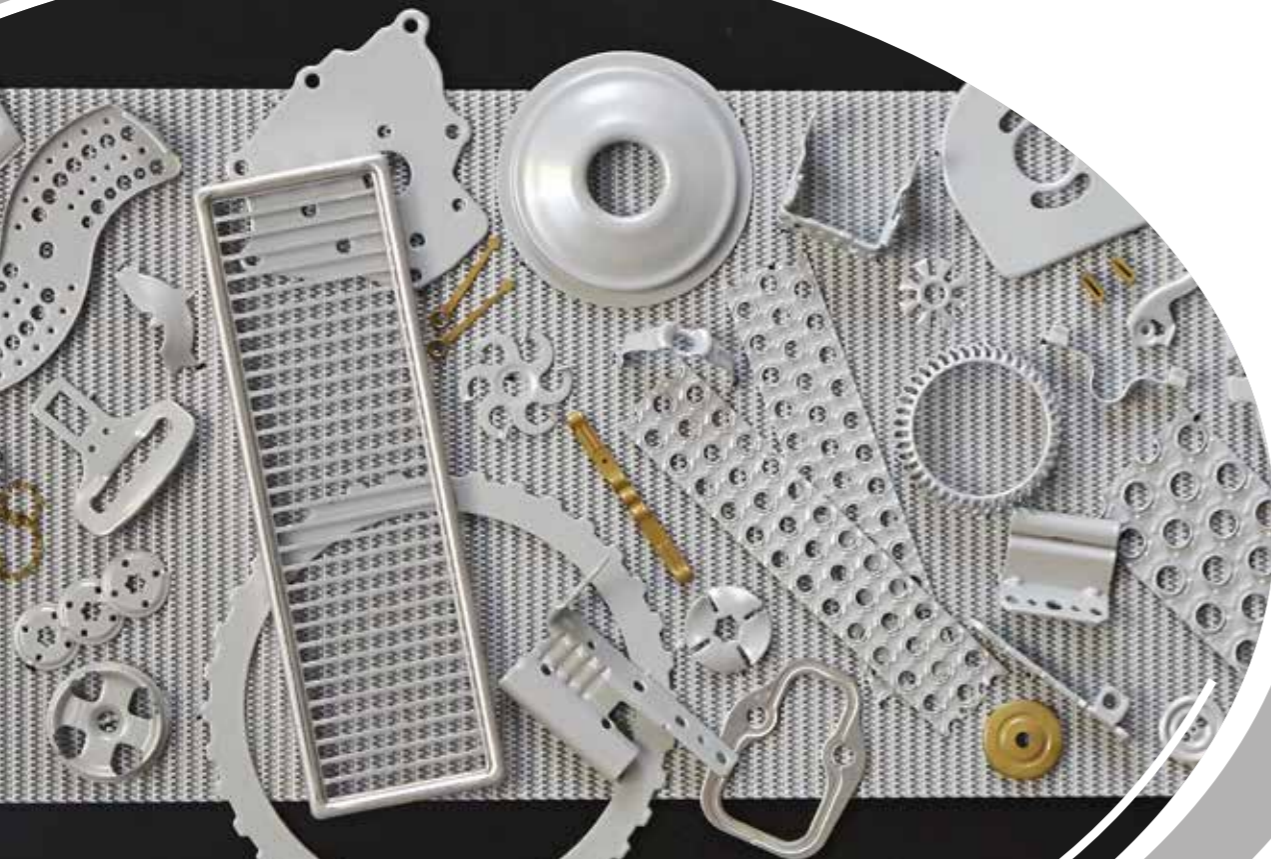

“ We deliver the highest quality and precision in design orders, parts according to drawings, difficult workpiece machining, measuring parts and in the construction of a wide variety of tools. ”

In order to ensure maximum precision, increasing quality standards and efficient rationalization, we rely on continuous and innovative modernization of our machinery.

Precision craftsmanship, modern technology

In our tool and die making, traditional craftsmanship is combined with the most modern manufacturing technologies to create tailor-made solutions.

Tool and Die making

By combining the experience of our employees and the performance of modern 3D CAD/CAM workstations, we optimize and rationalize all production processes.

With 100% vertical integration and interchangeability as well as high standards of service life and dimensional accuracy, the complex high-end product "precision tool" is created on controlled processing machines.

Precision in series

Our expertise in series production includes a wide range of products, such as parts for heat exchangers, window fittings, battery parts as well as stamped, bent and drawn parts for the consumer goods and automotive industries.

We design process-reliable progressive, transfer and insertion tools to produce every part with consistent quality and precision.

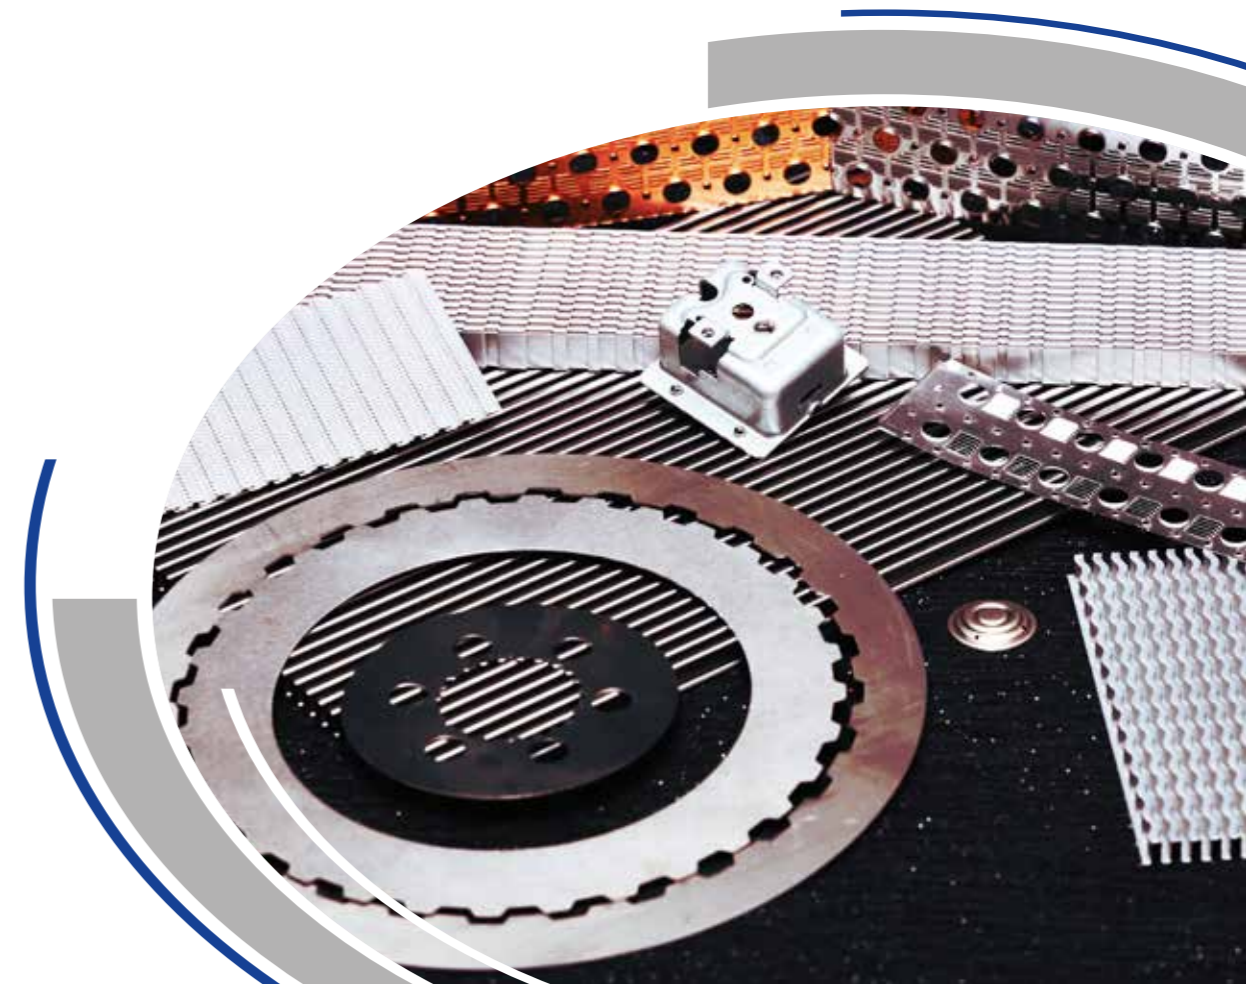

We are open to all customer requirements and offer modern and attractive solutions.

Our stamping shop

Precision and quality for your orders.

Modern metal forming and automatic stamping presses with 18-500 t pressing force and different drive concepts are available for contract manufacturing.

Whether production tests, user trainings, samples or large series – our experienced machine setters work with the utmost care on every order.

Quality assurance at the highest level

The latest technology in quality control enables the precise measurement of complex workpieces and stamped parts.

Our profile projectors, contour measuring devices and 3D coordinate measuring machines with tactile and optical sensors ensure efficient production.

The results are documented in our QA system to ensure complete quality assurance.

Quality made in Germany – our location for international activities

Our founding location, Sulzfeld (Baden-Württemberg), is the basis for our international activities. Here we work with 80 highly qualified employees on a production area of 5,000 m².

With decades of know-how in the areas of development and construction as well as the most modern technologies in tool and die making and production, we deliver the highest quality to our customers.
